

中国珠江三角洲城中村中非正规外来人口群体及其健康策略 Informal Migrant Communities and Health Strategies in Urban Villages of Pearl River Delta, China

德意志研究联合会 (DFG) 优先项目1233课题
Project of Priority Programme 1233 of German Research Foundation (DFG)

课题组组长: Project Coordinators: Prof. Dr. Bettina Gransow*, Prof. Dr. Frauke Kraas**
合作伙伴: Research Partners: Prof. Dr. Zhou Daming***, Prof. Dr. Xue Desheng****

*Institute of East Asian Studies, Free University Berlin; ** Dept. of Geography, University of Cologne; ***Dept. of Anthropology, Sun Yat-sen University, Guangzhou; ****Geography and Planning School, Sun Yat-sen University, Guangzhou

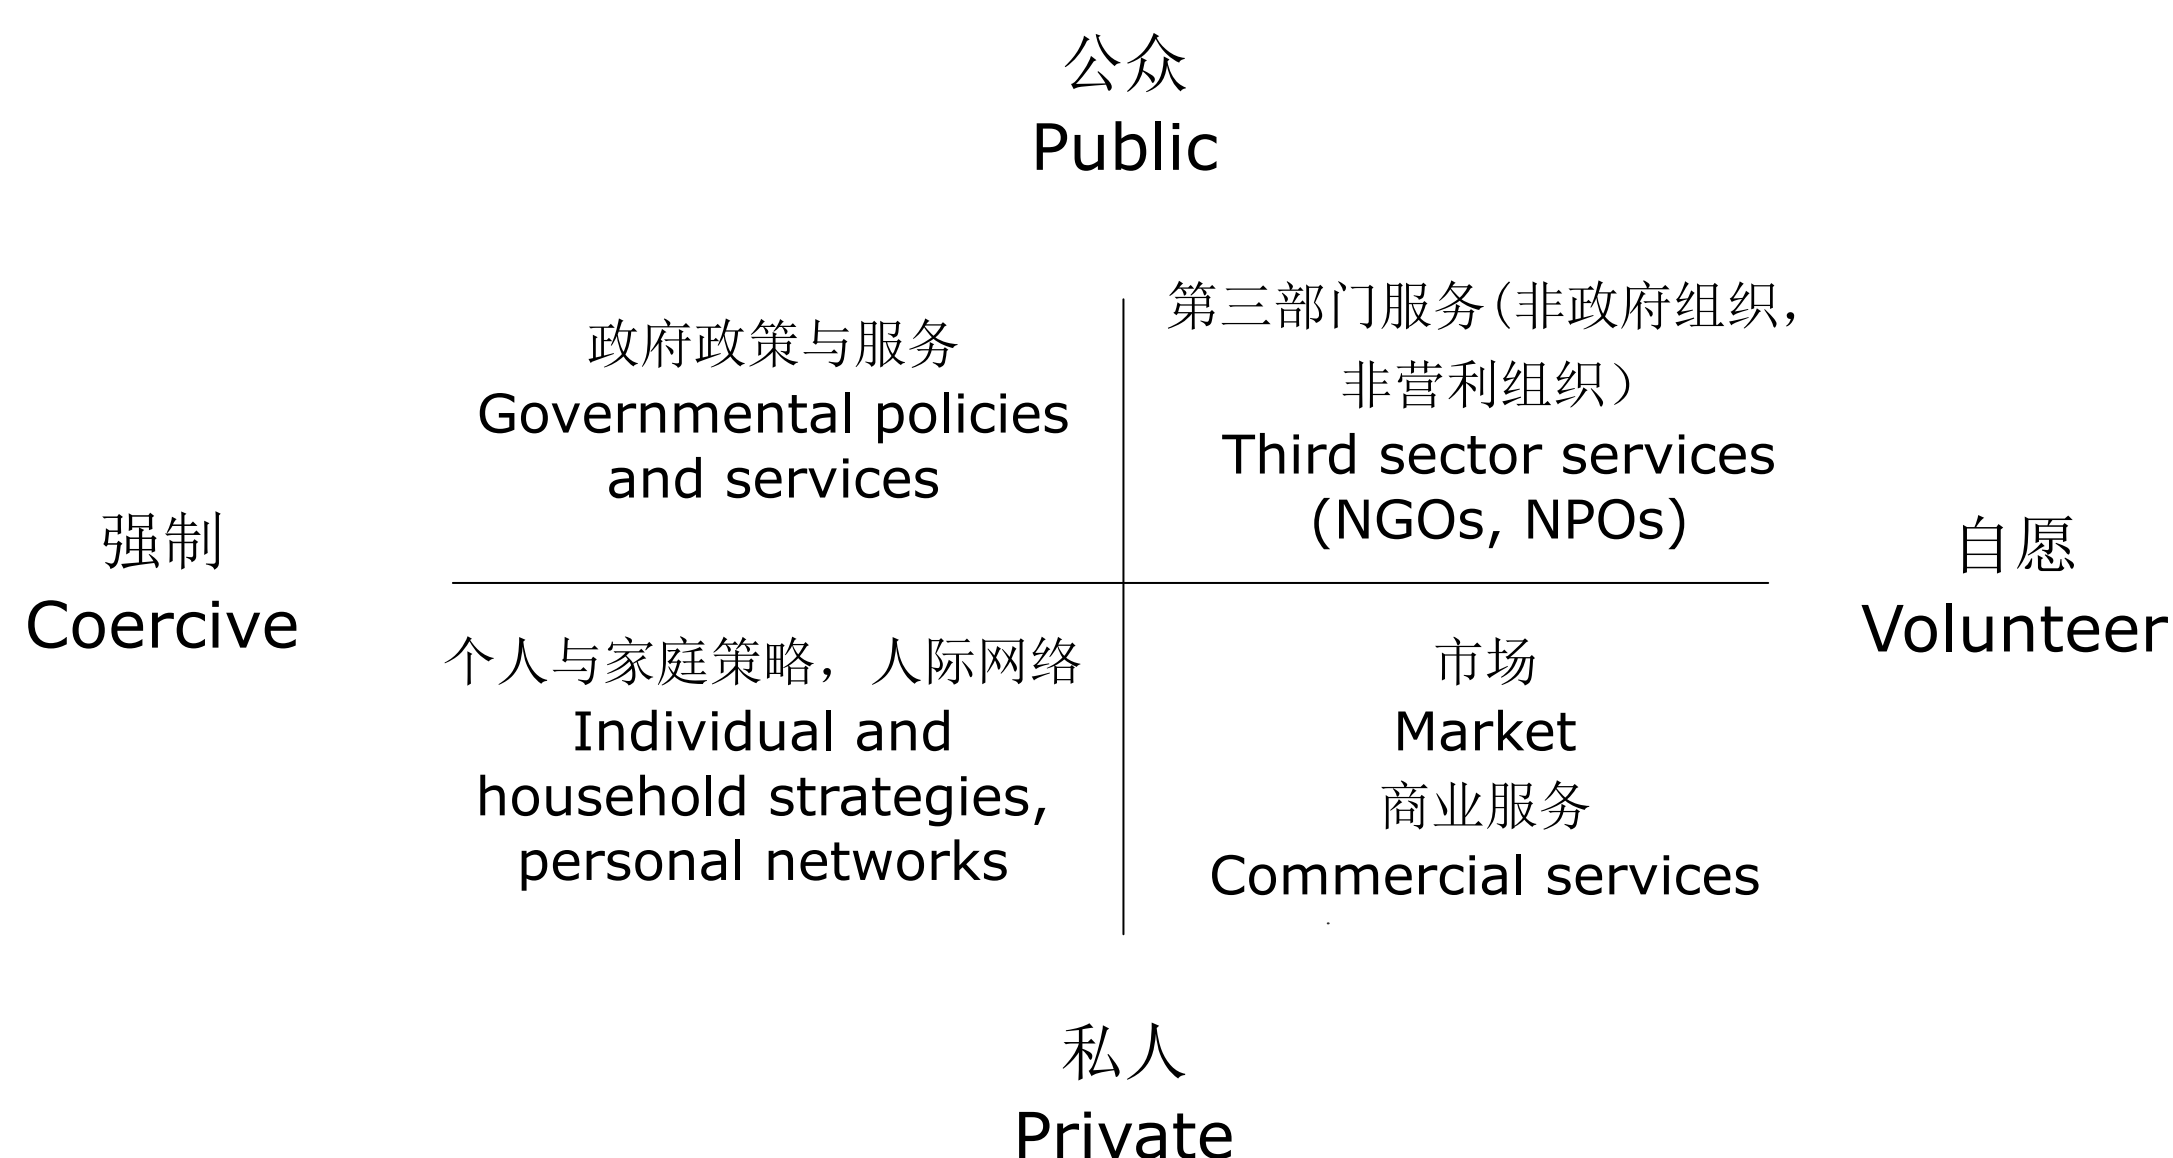

研究的核心问题: Central research questions:

1. 不完善的卫生保健体系对不同的外来人口群体产生了什么影响? How are different groups of informal migrants affected by the inadequate health care system?
2. 在此状况下外来人口如何应付? 他们采用了哪些非正规渠道及手段来应付国家提供的不足? How do they react and what alternative informal channels and means do they use to buffer the insufficient state support?
3. 其它行为体, 如行政机构、医疗服务提供者以及保险公司在地区、国家以及跨国的层面上起到了什么作用? What role do other stakeholders, such as administration, providers of health care and insurance agencies at the local, national and supra-national level play?
4. 流动人口及城中村的出现对中国大都市不协调的供求关系起到了多少影响? How far does the emergence of migration and urban villages contribute to a fragmentation of supply and demand aspects in Chinese megacities?
5. 以上几个方面对中国经济、社会以及政治稳定有何种程度的影响? To what extent do the above alleged aspects influence the ecological, social and political sustainability in China?
